

## Us and Them

When I was a young man  
My father said to me  
It's time you started thinking  
About the way that things should be  
If you don't see what's going on  
It's plain for all to see  
You'll be the only sane one left  
If they get me.

They get you in the morning  
And they get you after tea  
They get you at the weekend  
When you think your time is free  
They get you on the radio  
And they get you on TV  
They get you in the places  
where only you should be

If you don't see what's going on.....

They get you in the headlines  
And they get you in the news  
You get so many choices that  
You don't know what to choose  
They blind you with statistics  
'Till your totally confused,  
you end up thinking you could win  
when you are bound to lose

If you don't see what's going on...

They get you in the schoolyard  
And in the factory  
They get you in the office  
And at university  
They get you when you're dreaming  
And in reality,  
You'll be the only sane one left  
If they get me

If you don't see what's going on.....
